The Global Research Collaboration for Infectious Disease Preparedness (GloPID-R) is a network of research funding organizations in the area of infectious disease preparedness research.

The goal of the Global Research Collaboration for Infectious Disease Preparedness (GloPIDR) is to facilitate an effective research response of a new or re-emerging infectious disease with epidemic and pandemic potential, in order to save lives and economies worldwide. By bringing together funding bodies investing in research related to new or re-emerging infectious diseases, we help ensure that research capacity and capabilities are in place to support the conduct of scientific research.

29 members, Coalition for Epidemic Preparedness Innovations (CEPI) and the World Health Organization are engaged in GloPID-R:
